

Seeing More Clearly

A campaign for an MRI and more...

January 11, 2012

Ms Nicole Neff
431 Stevens St
North Bay ON P1B 4M9

Dear Ms Neff;

Thank you for your gift to *Seeing More Clearly: A campaign for an MRI and more*. Obtaining an MRI and other state-of-the-art diagnostic imaging equipment is essential for our district. Our new hospital can support this kind of progressive medical technology. Your gift is especially appreciated by those it impacts – our patients.

Each year our dedicated radiology staff performs more than 100,000 tests. Our CT scanner performs over 19,000 exams each year. Our wait time for CT scans is 15 days. That's half the provincial target, and 31 days shorter than the provincial average.

Until now, more than 2700 MRI scans were completed elsewhere each year. Patients had to travel to Sudbury, Timmins, Ottawa, Barrie and Toronto for an MRI. Patients have waited weeks or even months for their scans. With the addition of an MRI, digital Mammography, X-ray, Fluoroscopy and Angiography equipment as well as a SPECT/CT for nuclear medicine, our district now has access to the diagnostic imaging scans they need.

With your support patients and families will be spared the extra stress and expense of travel. Our community will enjoy shorter wait times and faster diagnoses with more accurate treatments and better medical outcomes.

Your support makes a difference. Thank you for giving the gift of health.

Yours sincerely,

Al McDonald
Campaign Co-Chair

THANKS Nicole!

Ted Thomson
